AUTO MOBILE SERVICES

TRACTOR REPAIR

Book the nearest tractor mechanic from your phone, in your own language.

Mobile application concept · Customer app and mechanic app

THE PROBLEM

A BROKEN TRACTOR STOPS THE WHOLE FARM

HELP IS SLOW TO FIND

Phone calls to friends, or a trip to town, before anyone can look at the fault.

PRICES ARE UNCLEAR

The cost is often agreed only after the mechanic has arrived.

TRUST IS HARD

No easy way to know who is skilled, or who has done the job well before.

HOW IT WORKS

REQUEST, ASSIGN, REPAIR, PAY

1

REQUEST

Describe the fault by voice, photo or taps, and share a GPS pin.

2

ASSIGN

The nearest available mechanic gets the job, as in a ride-hailing app.

3

REPAIR

The customer approves the quote, then the mechanic starts with a code.

4

PAY

Online by UPI or card, or cash to the mechanic.

TWO APPS

ONE FOR CUSTOMERS, ONE FOR MECHANICS

CUSTOMER APP

- Choose a language, sign in with a mobile number
- Request by voice, photo and GPS pin
- See the assigned mechanic, track and call
- Approve the quote, pay, rate

MECHANIC APP

- Register with ID and skills, get approved
- Go online and receive nearby requests
- Accept, call the customer, navigate
- Send a quote, collect payment, track earnings

BUILT FOR RURAL USERS

IN THE LANGUAGE PEOPLE SPEAK

English

తెలుగు

हिन्दी

Every screen switches language. Voice input, photos, a GPS pin and a read-aloud button mean less typing and less reading.

TRUST

SAFETY IS BUILT INTO EACH STEP

VERIFIED MECHANICS

SMS code, ID document and team approval before any job.

CODES AT BOTH ENDS

A start code and a finish code stop fake or unfinished jobs.

QUOTE BEFORE WORK

The customer approves the price before the repair begins.

RATINGS THAT COUNT

Star rating and services done show on every mechanic profile.

PAYMENTS

TWO WAYS TO PAY, ONE FEE PER JOB

ONLINE

UPI or card. The platform fee is taken from the mechanic's payout.

CASH

Paid to the mechanic. The fee is added to a balance they settle in the app.

visit charge

WHAT NEXT

START SMALL, NEAR HOME

1. Talk to farmers and mechanics to confirm the problems, prices and fee.
2. Pilot in one area, [district], with [__] verified mechanics.
3. Build the first working versions of both apps.
4. Later: spare parts ordering, service reminders, towing.
